## FIELDS OF INTEREST

Empirical Microeconomics, Labor Economics, Family Economics

## EDUCATION

### University of Amsterdam

PhD Economics

Sept 2020 - July 2025 (expected)

### University of Michigan

Research visit invited by Basit Zafar

March 2024

### University of Pennsylvania

Research visit invited by Francesco Agostinelli

Jan 2024 - Feb 2024

### University of Amsterdam & Tinbergen Institute

MPhil Economics

Sept 2018 - June 2020

### Tilburg University

BSc Economics

Sept 2015 - June 2018

### Hong Kong University of Science and Technology

Exchange Semester

Sept 2017 - Dec 2017

## JOB MARKET PAPER

### Parenthood Timing and Gender Inequality

*Abstract:* I study how parenthood affects women's labor market outcomes and gender inequality using quasi-experimental variation in the success of assisted conception procedures (ACP). I introduce a method for bounding the effects under minimal assumptions by leveraging women's complete ACP histories, simultaneously addressing selective fertility timing and timing-dependent effects. Using administrative Dutch data, I find sizable and persistent effects on women's work hours and income, which account for up to half of post-child gender inequality in these outcomes. I also disentangle and quantify how selective timing and timing-dependent effects bias conventional estimators, providing insight into the conflicting results in the literature. My approach is applicable to other settings where individuals are quasi-experimentally assigned to one state but may enter others either through direct selection or by opting into quasi-experimental reassignment.
